

# DIARIO DE ERASMUS

01-08/02/2024

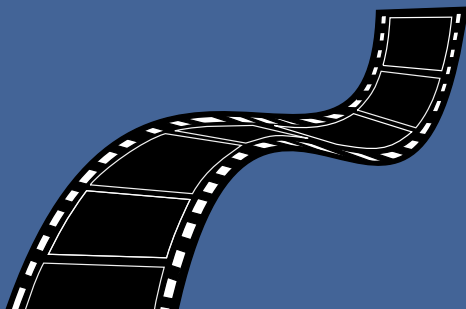

01/02

# DAY 1

**The first day was practically an entire trip, we left Chiclana around seven in the morning and we did not arrive in Sulz until six in the afternoon. When we got there, of course, it was already night. The bus dropped us off at the door of the institute and once there we each went with our classmates. When we got home, he showed me my room and then we had dinner while watching a movie. Later we went for a walk around the urbanization. I had never seen the stars as clear as that day. I was able to observe several constellations and they were all seen perfectly.**

# DAY 2

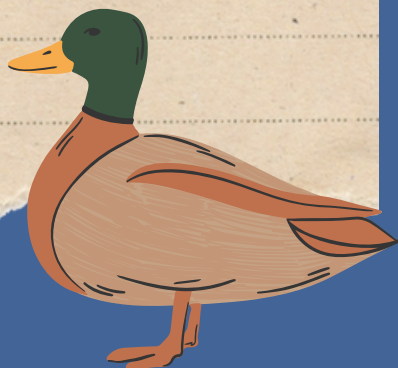

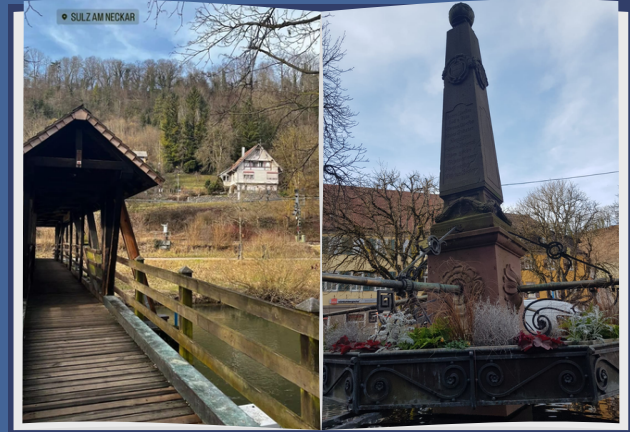

**We got up and went to school. But first we made a stop to buy breakfast. We arrived at class with the other classmates. When the teachers arrived at the class, they handed out the week's schedule and explained it. After that class we went to finance class.**

**At lunchtime we returned home, but with Amanda and her partner.**

**Then we returned to the institute, and while they had a meeting, we with a guide went for a walk around Sulz.**

**At night we all stayed in a kind of house, where they held celebrations like birthdays or other things.**

03/02

# DAY 3

Today we went to climb the Rottweil tower. Once up we could see the entire city, and even some nearby ones.

Then we went to a science museum, the museum was a wonderful experience, at least for me. There were many experiments that could be tried and that made it undoubtedly unique. When we finished with the science part, we went to the virtual reality part. They put us in batches of twelve, the virtual reality glasses. For lunch we went to the Italian restaurant where my partner's sister works, and on the way we saw a little of the city.

In the evening we went to dinner at a bowling alley, where we also played bowling of course. .

# DAY 4

**Today, Sunday, we went to the carnival with everyone. An incredible day.**

**Their carnival is super curious compared to ours. At first it shocks you a little but the more you look you can find several curious things. It was a parade of towns, so to speak, each float had a typical town costume and something that represented them. In addition, there were a type of witches who painted your face if they caught you off guard and if they could, they would grab you and put you inside the float.**

# DAY 5

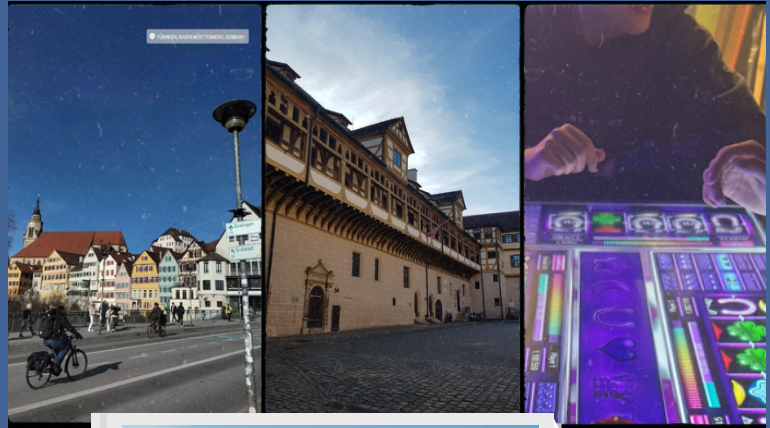

05/02

First we took a bus to the train stop. We got on the train and headed to the city of Tübingen. I have to say that of all the cities this was the one I loved the most, the wonderful architecture of the buildings is incredible.

We arrive at the meeting point with the guide and begin the tour. In that city were the oldest universities, which are still universities today.

At the end of the tour we had free time, we decided to go to a shopping center where there were many luxury brands.

When we finished the day, at night we all went to a house and spent time playing with a machine.

# DAY 6

06/02

A pretty fun morning, today we had the presentations. We have even dared to dance a Sevillana for the German students.

After classes we got on a bus heading to Unteruhldingen. Once there we visited a fishing village from the Neolithic age.

Then the bus picked us up again to go to Meersburg, but before that they gave us free time to eat.

Without a doubt the coldest day I have ever spent. As we were next to Lake Constance there was more humidity in the air.

We all went to eat together, and then we went on the last guided tour. This time to a castle from medieval times.

Incredible experience visiting this castle inside, full of super curious and very well preserved rooms. Since everything was original and many of the things were not even restored.

When we arrived in Sulz we all went to one of our colleagues' house and ordered several pizzas while we watched football..

07/02

# DAY 7

**Instead of going to our usual high school, we went to the Oberndorf high school.**

**The first hour we were in Spanish class and then we made two groups. One went to the kitchen to make the food that we would all eat later. And the other group went to a metalworking workshop, they made flashlights and pencils.**

**Later we all ate together in a dining room. When we finished, in the afternoon my partner and Amanda went home and once there we ate something and watched a series on television all together.**

**Other classmates went to the ice rink.**

**Then at night we went to a carnival party, to say goodbye to our last day**

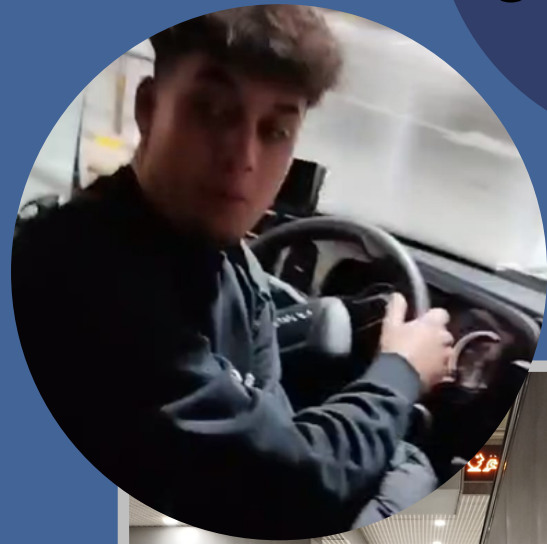

08/02

# DAY 8

**Our last day here, we spent the entire morning doing the final project.**

**Without a doubt a day with many emotions involved. But in brief, it has been a wonderful experience and if I could turn back time to repeat it I would do so without hesitation.**

**A very good return flight and an even better bus trip.**
